

Special Care Considerations For Honed Finishes

CaesarStone is proud to offer select colors in a **HONED FINISH** — A unique matte finish that remarkably looks and feels like untouched natural stone, but with durability that only CaesarStone can offer.

Please understand that the **HONED FINISHES** require more daily maintenance than our polished finishes. Since there is more exposed surface area with honed finishes, metal marks, finger prints and other signs of daily living will be more apparent, especially on darker colors. However, these superficial marks can be removed with little effort by using non-abrasive cleaning products such as Soft Scrub® Gel with Bleach Cleanser or Comet® Soft Cleanser with Bleach and a Scotch-Brite® Multi-Purpose Scrub Sponge.

By signing this document, you agree that the properties of this unique finish have been fully explained to you and that you understand that more frequent cleaning may be required to keep the product looking new and free of marks. You also understand that while CaesarStone has a 10-year limited warranty, this warranty covers failures caused by product defects when the material is installed by a CaesarStone Certified Fabricator. Temporary marks that are common on the honed finish are not covered by our Limited Residential Warranty.

For additional warranty information please refer to the Limited Residential Warranty and the online Care and Maintenance section on the CaesarStone USA website at www.caesarstoneus.com.
